Product Line:

TouchTimeII®

Model: 3007-A0027

Features

- *Microsoft Windows 8.1 Pro*
- *Display 10.1" Clear Type HD*
- *5 Finger Touch (Capacitive)*
- *CPU 1.33GHz Atom*
- *Low-power multi-media platform*
- *64GB storage*
- *Sealed*
- *Rugged Enclosure*
- *CMI API For Peripherals*
- *Wi-Fi (802.11a/b/g/n)*
- *Secure web protocols HTTPS*
- *Bluetooth 4.0 technology*
- *Ethernet*
- *Camera*
- *USB 2.0*

Benefits

The Touch Time II is a Windows 8.1-based touch screen data-collection terminal with integrated peripherals designed to provide a kiosk style user experience, along with built-in employee auto-identification peripherals. It is ideally suited for workforce management, shop floor data-collection, or self-service kiosk based applications. The terminal features a 10" capacitive touch screen interface. It also provides integrated WiFi, Ethernet, and an external USB port, providing ease of connectivity to virtually any type of network.

The Windows 8.1 Pro operating system provides a familiar interface for users and system administrators alike and is capable of running Java, .Net, browser-based, (such as Chrome or Internet Explorer) or any other Windows-based application. The Windows eco-system allows for the adoption or integration of a wide range of peripherals and components.

Application development and deployment is made even simpler with CMI's application loading and monitoring system, which facilitates deployment and updates of Java-based applications.

Application servers such as CMI's System Manager terminal management platform can be leveraged to provide seamless data-collection and network management support of very large terminal deployments.

Label Description: TouchTime II® Terminal Assy
